

## Off-license Medications

Your pet has been prescribed a medicine that is not specifically licensed for veterinary use.

Licensed medicines come with a 'data sheet' that details how to use them, side effects and safety, based on extensive tests. For non-licensed drugs we rely on information collated un-officially from their use in practice. Most of these medicines are human drugs, some have been used for a very long time in veterinary medicine.

Please click on the appropriate link below for information on the safety, side effects and use of the medicine your pet has been prescribed. If you have any further questions, please call the practice or contact us via Petsapp.

Allopurinol <a href="https://tinyurl.com/yhr6e5z3">https://tinyurl.com/yhr6e5z3</a>	Gabapentin <a href="https://tinyurl.com/bp6pzub6">https://tinyurl.com/bp6pzub6</a>
Amantadine <a href="https://tinyurl.com/43624n44">https://tinyurl.com/43624n44</a>	Lantaprost (Xalatan) <a href="https://tinyurl.com/3xcacz3a">https://tinyurl.com/3xcacz3a</a>
