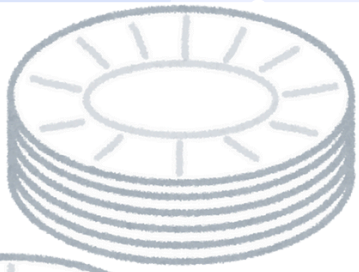
Make a cotton wool polar bear!

You will need:

Paper plates
Cotton wool balls
Glue
White card
Black card
Scissors



How to make your cotton wool polar bear

1. Cover the paper plates in glue (be careful when you do this!) and then cover the plates in cotton wool balls. The more you add, the fluffier your polar bear will be!
2. Cut out some round shapes from the white card - these will be your polar bear's ears! You can colour in some little pink bits on the inside of the card if you want to. Stick the ears in place!
3. From the black card, cut out some eyes, a nose, and a mouth, and glue these on top of the cotton wool.
4. Sit back and admire your creation! What cute animals will you make next?
