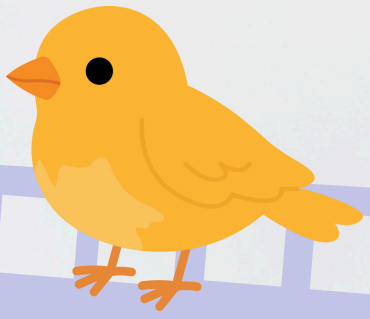
Make an apple bird feeder



You will need:

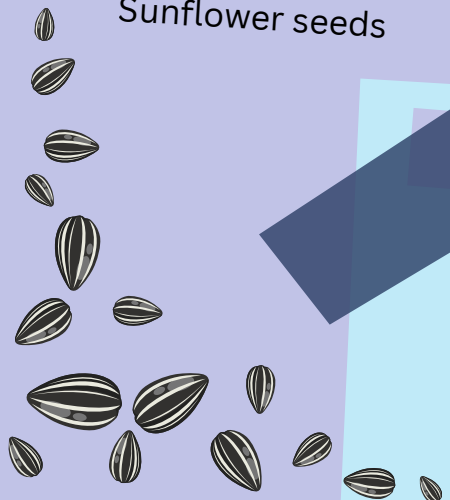
An apple

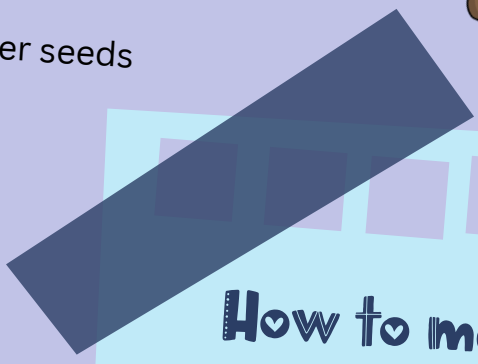
An apple corer or skewer

Some string

A stick

Sunflower seeds





How to make your apple feeder

1. Ask an adult to create a hole through the centre of the apple (they'll probably find it easiest to use an apple corer for this!)
2. Thread the string through the hole, and tie the bottom of the string to a stick. This wil act as a cool little perch for your visiting birds to sit on as they munch the apple!
3. Push sunflower seeds into the apple as an extra treat. You can add as many as you want - the birds will certainly thank you for it!
4. With an adult, tie the top of the string to a tree so that the apple feeder is hanging.
5. Sit back and wait for the birds to come along to enjoy the tasty treat you've made them!
